Digital Photography Competition

'Architecture and the built environment that surrounds us'

Digital Photography Competition

Architects are involved in shaping the world that surround us, they have the ability to influence the look and feel of the built environment, to enrich lives physically, psychologically and spiritually. Great architecture does more than simply meet its brief. It works in relationship with the landscape, enhancing our appreciation of the physical environment it occupies.

The brief of this competition is: Architecture and the built environment that surrounds us. People can interpret the brief in a wide range of ways. The only catch is images must be taken in the Waikato Region
